

VANESSA BATTUNG

FULL STACK DEVELOPER

CONTACT

- 0977-235-8599
- vane0121.vb@gmail.com
- Cabuyao, Laguna, Phils.

SKILLS

Frontend

- ReactJS
- Blazor
- ASP.NET Core
- HTML/CSS
- Bootstrap
- KnockoutJS
- Material UI
- jQuery

Backend

- ASP.NET Web API
- Windows Service
- RESTful API
- EF Core
- SOAP API
- SSMS
- MySQL
- Workbench/J

DevOps & Tools

- Azure DevOps
- GitHub/Git
- Docker
- IIS

Languages

- C#
- VB
- SQL
- JavaScript
- TypeScript
- Python

EDUCATION

BS in Food Technology <i>LSPU</i>	2010
High School <i>Pulo Nat'l High School</i>	2005
Elementary <i>Jose Rizal Mem'l School</i>	2001

ACHIEVEMENTS

Developing ASP.NET Core MVC Web Applications <i>TRENDS Academy</i>	2022
--	------

TESDA	
• Intro to Computer Systems Servicing	2021
• Installing & Configuring Computer Systems	
• Setting Up Computer Network	

PROFESSIONAL OVERVIEW

Full Stack Developer specializing in React, Blazor, and ASP.NET Core Web API, with experience in building scalable architectures, optimizing application performance, and delivering robust, production-ready web solutions in collaborative team environments.

WORK EXPERIENCES

Software Developer Feb 2026 – Present

Accionalabs | Client: Western Digital

Developed 8 intelligent Digital Workers — automation systems designed to streamline supply chain and inventory operations:

- Shortage Prediction Worker** — Predicts potential inventory shortages before they occur.
- Auto PR/PO Generation Worker** — Automates the creation of purchase requests and purchase orders.
- E-Pull Automation Worker** — Automates electronic pull processes for material handling.
- Expiry Risk Worker** — Identifies and flags items at risk of expiration.
- Consumption Analytics Worker** — Analyzes consumption patterns to drive data-informed decisions.
- Inventory Optimization Worker** — Optimizes inventory levels for cost efficiency and availability.
- Alert & Escalation Worker** — Sends automated alerts and escalations for critical supply events.
- AI Context Preparation Worker** — Prepares and structures data context for AI-driven decision-making.
- Built scalable automation solutions following Clean Architecture principles, utilizing Windows Services for background processing, ASP.NET MVC for management and monitoring interfaces, and Microsoft SQL Server for data storage and reporting.

Freelance Fullstack Developer (.NET and Blazor) Aug 2025 – Feb 2026

Upwork

- Developed a Point of Sale (POS) System with inventory management, sales tracking, and reporting features.
- Built the system using Blazor and .NET Core API, ensuring a responsive and user-friendly interface.

Fullstack Developer (.NET and Blazor) Mar 2025 – Aug 2025

Vertere Global Solution Inc | Client: Toyota TMP

- Developed a Quality Management System (QMS) for quality monitoring and reporting.
- Contributed to a Vehicle Monitoring System (VMS) supporting delivery and logistics tracking.
- Built features using Blazor and ASP.NET Core Web API.

Fullstack Developer (.NET and React) Mar 2024 – Mar 2025

Kareila Mgmt Corp. | Client: S&R

- Developed a Warehouse Management System (WMS) to manage inventory, item placement, and stock operations within the warehouse.
- Created Inbound, a warehouse tracking system that monitors items from delivery through supervisor, manager, and worker workflows.
- Built features using React and .NET Core API, ensuring scalability and efficient database operations.

Fullstack Developer (.NET Core MVC and API) Sep 2023 – Mar 2024

SLI Consulting Inc | Client: China Bank

- Developed LACS (Loan Application Capturing System), enabling employees to create loan applications with automatic computations and loan-related features.
- Built the system using ASP.NET Core MVC and API, ensuring reliability and scalability.

Fullstack / Desktop Developer (.NET Framework) Feb 2021 – Aug 2023

Toshiba Information Equipment Phils Inc.

- Developed and maintained multiple web and desktop applications using .NET Framework, Blazor, and ASP.NET Core API.
- Delivered solutions for various projects including internal tools, monitoring systems, and workflow automation.
- Collaborated with cross-functional teams to ensure scalable, reliable, and user-focused software.
